A solution, not just a system.

EnviCor's Liquid Management Solution (eLMS) provides:

- » Maximum waste oil rebates and reduced theft
- » Accurate, actionable information delivered via advanced technology
- » Automated alerts and reports to better manage your business

Smarter tank. Better management.

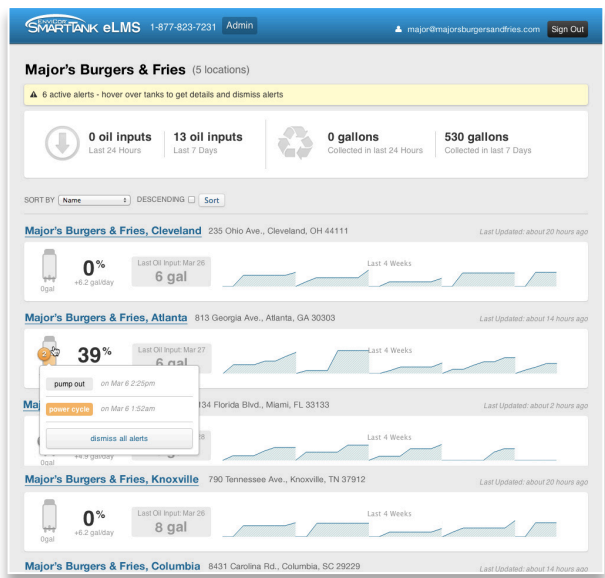

Advanced Technology

- » Embedded intelligence
- » Two-way wireless communication
- » Advanced algorithms and programming

Advanced Design

- » Pressure transducer
- » Roto pump
- » Modular components
- » Multiple tank sizes
- » Multiple connection options

Inform your business with eLMS.

Comparison View

- » Multi-unit summary of oil inputs and collections
- » Current tank levels and alerts updated in real time
- » Spot trends and compare oil inputs across locations
- » Identify locations inputting oil too frequently or not often enough

Location View

- » Detailed overview of oil inputs and collections
- » Tank volume and daily input graphs for the last 4 weeks
- » Track activity for last 7 oil inputs and last 3 recycler collections
- » Historical data can be downloaded into Excel via CSV file

Improve profitability with the SmartTank.

With performance that translates into a cooking oil rebate of about 13%, the SmartTank also creates a safer, cleaner and more productive workplace, without the risk and expense of outdoor receptacles.

2,500 gallons (18,350 lbs)
= \$13,000 (\$5.20/gal)

Older Containers

Collected oil	70%	70%
Lost to theft	0%	18%
Net recycled oil	90%	60%
Market price per lb.	15 cents	15 cents
Annual used cooking oil rebate	\$1,734	\$948
